

# Committee of Supply 2024

# CREATING A CLEAN, GREEN & RESILIENT SHARED SINGAPORE

Ministry of Sustainability  
and the Environment

— SINGAPORE —

# IMPROVING THE WELL-BEING OF OUR COMMUNITY

## Tackling cleanliness hotspots

- Increase frequency, scale and visibility of enforcement blitzes
- Four-fold increase in CCTV deployment to enhance deterrence and facilitate enforcement against offenders

## Tackling unhygienic public toilets

- Public Toilets Taskforce to develop solutions and galvanise collective action to improve cleanliness
- Enhance enforcement on dirty public toilets

## Enhancing vector control

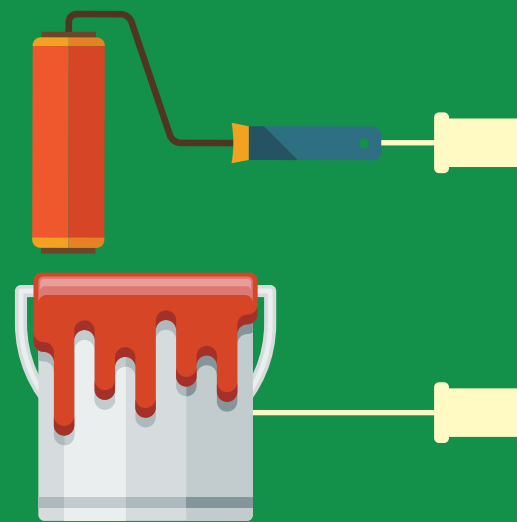

- Pilot thermal technology to improve rat surveillance
- Expansion of Project Wolbachia-Singapore to 5 additional sites - bringing total coverage to 35% of all households
- Step up enforcement of poor waste management at food premises and bin centres

# IMPROVING THE WELL-BEING OF OUR COMMUNITY

## Improving indoor air quality to safeguard public health

- Introduce formaldehyde limits for interior paints

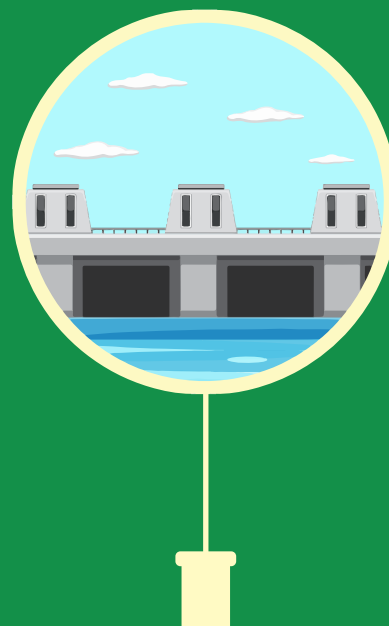

## Fostering joint food safety responsibility with industry

## Protecting our supply of clean water

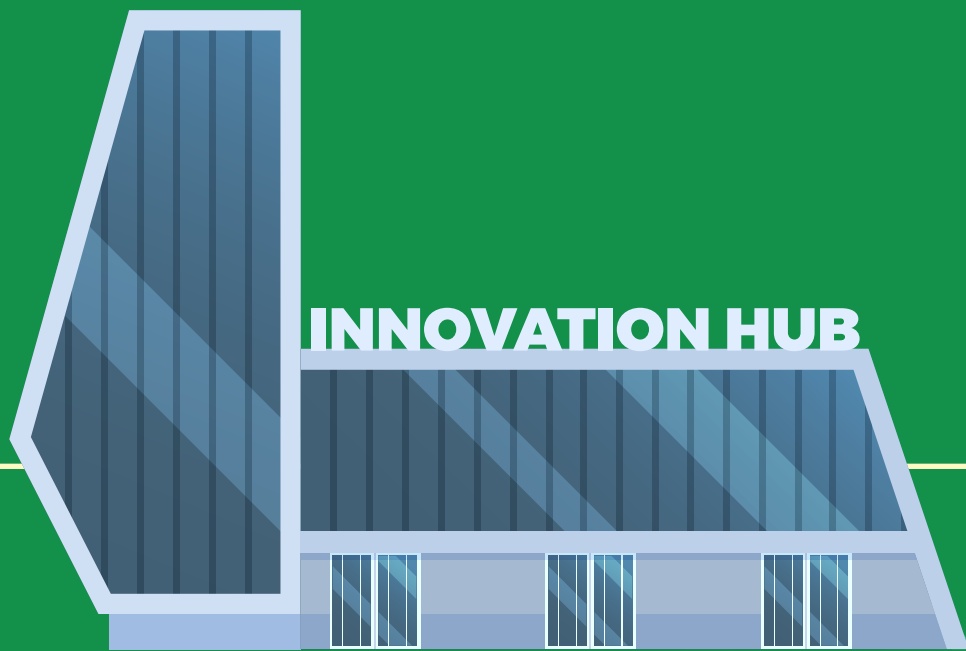

- Introduce measures to further deter silt discharges into our waterways and reservoirs, and illegal discharge of harmful substances into our public sewerage system

- Refine food safety grading system to recognise food establishments with good track record of food safety and food safety management systems
- Remove the need for licences for market stalls selling non-food and low-risk food items and vending machines selling pre-packed food

# IMPROVING THE WELL-BEING OF OUR COMMUNITY

## Enhancing industry capability & leveraging technology

- Opening of industry-led Enviro Tech Innovation Hub (EITH@TP) to advance sustainable cleaning and support our cleaning workforce
- Explore the use of artificial intelligence-powered video analytics to detect cleaning gaps more quickly

## Rallying the community

- Encourage everyone to play their part through campaigns such as “Keep Singapore Clean” and “Go Green SG”
- Expand Community Auditor Programme to audit performance of cleaning service providers at private housing estates

# PRESSING ON TOWARDS NET ZERO

**Supporting households  
and businesses to be  
more resource efficient**

**Climate  
✓  
Vouchers**

- Enhancement of Climate Friendly Households Programme to encourage all HDB households to switch to energy and water efficient household appliances
- Expansion of energy labelling scheme to household water heaters and commercial storage refrigerators to help households and businesses make informed energy efficient choices
- A more streamlined Energy Efficiency Grant for businesses

**Greening the public  
sector's procurement  
policies**

**GREEN  
GOV SG**

- Expand scope of tender evaluation points for sustainability to MICE events
- Inclusion of waste data in future GreenGov.SG reports

# IMPROVING OUR RESOURCE SUSTAINABILITY

## Supporting businesses in building waste management competencies

- New course to train up Zero Waste Managers to champion 3R (Reduce, Reuse, Recycle) efforts in their organisations

## Reducing packaging waste

- Commence study to explore feasibility of expanding the Extended Producer Responsibility approach to cover more types of packaging waste, beyond beverage containers

# STRENGTHENING CLIMATE RESILIENCE

## Protecting our coasts

- Propose new legislation and Code of Practice to support coastal protection measures
- Conduct site-specific studies at City-East Coast, North-West Coast and Jurong Island to better understand Singapore's coastlines
- Continue to engage stakeholders on coastal protection efforts, including for Long Island

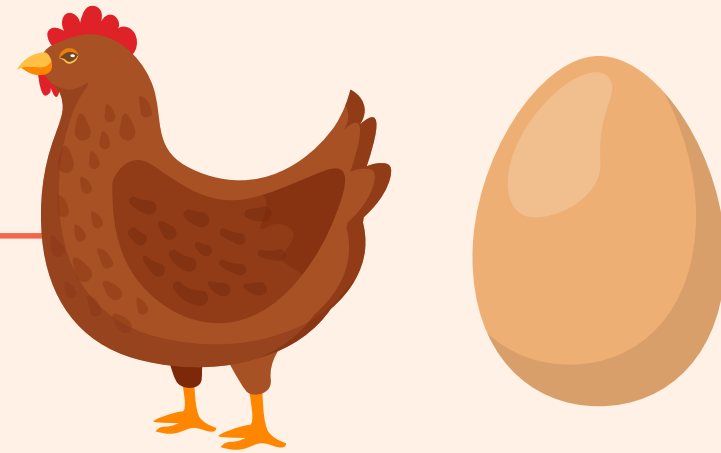

## SECURING A SUPPLY OF SAFE FOOD

### Strengthening our food safety & security regime

- Upcoming Food Safety and Security Bill to better protect consumers and safeguard food supply resilience

### Working with industry to diversify food import sources

- Accredited new food import sources in 2023 (e.g. Indonesia for live chickens and eggs, Türkiye for eggs)

### Playing our part for food supply resilience

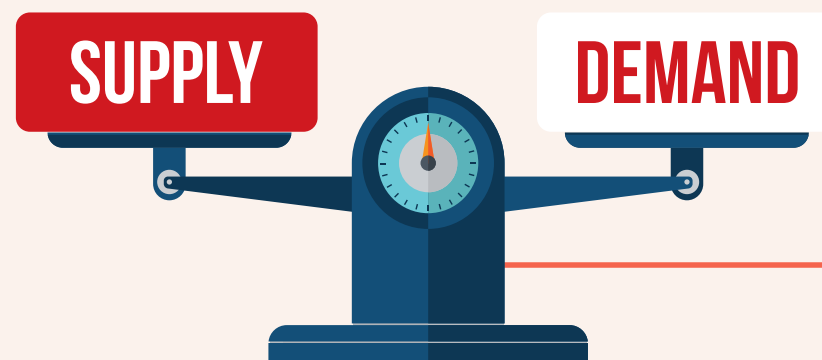

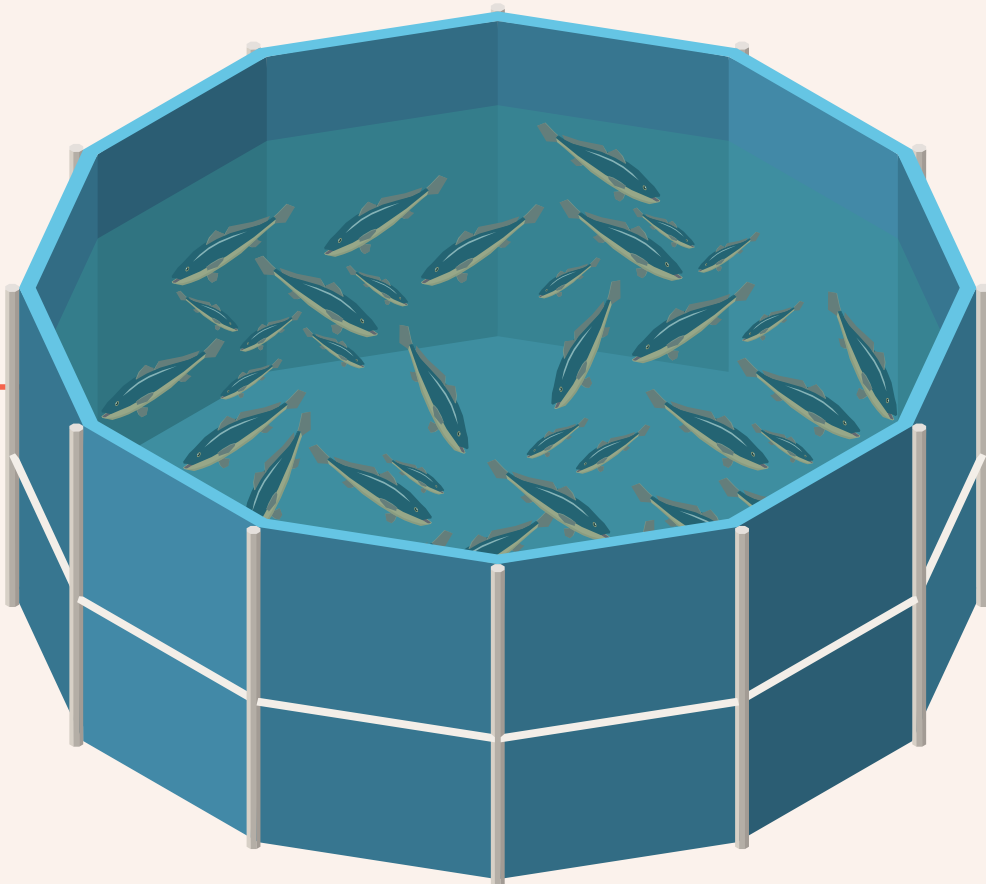

- Piloted a Food Resilience Preparedness Project involving secondary school students to educate them on the importance of food security

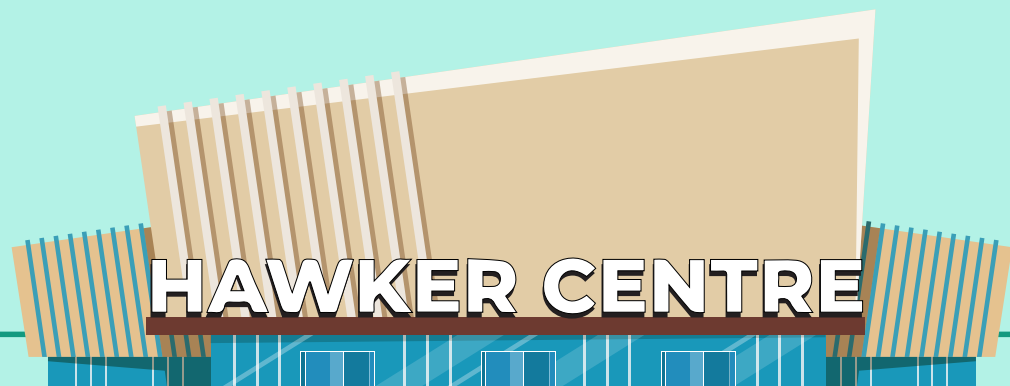

# SECURING A SUPPLY OF SAFE FOOD

## Uplifting our local agri-food sector

- Transform our aquaculture sector through the Singapore Aquaculture Plan, which will embody our collective vision for productive and sustainable aquaculture
- Partner stakeholders to better match supply and demand for local produce via an industry-led aggregator, as well as develop a uniquely Singaporean fish product
- Onboard more food establishments to the Farm-To-Table Recognition Programme

## ENSURING ACCESS TO AFFORDABLE HAWKER FOOD

- Three new hawker centres to open in 2024
  - ▶ Woodleigh Village
  - ▶ Anchorvale Village
  - ▶ Punggol Coast

## EMPOWERING YOUTH ACTION

- Develop and enable a community of future leaders and environmental champions through the Climate Youth Development Programme
- Empower youths through the #GreenHacks youth panel to co-create policy recommendations on sustainable consumption
